Humidity

Node-RED interface showing a flow named "testing_flow". The flow contains two nodes: "my_inject_node" and "Output_node". The "Output_node" is a debug node. The interface includes a sidebar with node categories (common, function) and a right-hand panel for configuration and deployment. The browser address bar shows the URL: `node-red-uzhqs-2022-10-08.au-syd.mybluemix.net/red/#flow/4a7855400c60c63e`. The Windows taskbar at the bottom shows the time as 2:33 AM on 10/16/2022.

Node-RED interface showing the "Edit debug node" dialog box. The dialog box is open for the "Output_node" and displays the following properties:

- Output:** msg.payload
- To:** ☒ debug window, ☐ system console, ☐ node status (32 characters)
- Name:** Output_node

The "Enabled" checkbox is checked. The "Done" button is highlighted in red. The background shows the "testing_flow" with the "my_inject_node" and "complete: 1" node. The browser address bar and Windows taskbar are visible at the bottom.
